

Appl. No.: 10/731,829
Amdt. dated 10/04/2005
Reply to Office action of April 4, 2005

Amendments to the Specification:

Please amend the paragraph beginning on page 9, line 4 as follows:

In one embodiment of the present invention, the first conductive elements 32 include an insulative portion and a plurality of conductive portions, such as flatwire, i.e. flex circuit, segments. As such, the connector inserts 30 may be conductively connected to one or more flatwire segment. The connections between connector inserts 30 and such conductive elements are the subject of U.S. Patent Application Number [[]] 10/757,838, entitled "Electrical Connector Insert and Apparatus and Associated Fabrication Method", which is incorporated herein in its entirety by reference.
